- Description** Elkem Microsilica® is a key ingredient in advanced low and ultra-low cement castables. It is highly reactive during sintering, which leads to improved ceramic bonding at reduced firing temperatures.
- Applications** Elkem Microsilica® is used in castables, gunning mixes and other shaped and unshaped materials.
- Features** Elkem Microsilica® 971 is offered both as Undensified (971-U) and Densified (971-D).
- Benefits**
- Improved flow – easier to cast
 - Improved particle packing - denser castables
 - Gel-bonding
 - Improved hot-strength properties

**** When packed

- Packaging** The product is available in 25 kg small bags and various sized big bags. Please contact our sales representative for more details.
- Storage and handling**
- Avoid dust generation
 - Store material properly, protected from moisture and contamination
- Health, safety & environment** Please consult our Product Safety information on our website: <https://www.elkem.com/silicon-products/refractories/microsilica/page-1/>.
- Sustainability** For Elkem, sustainability is central to our business strategy. Our mission is to provide advanced material solutions shaping a better and more sustainable future, adding value to our stakeholders globally. We are committed to reduction in embodied carbon emission. For further information, please visit www.elkem.com/sustainability/ or contact us to learn more about our sustainability roadmap.
- Additional information and contact** For further information, please contact our local sales representative. Our specialists will assist you in solving individual problems.
